ADDITIONAL INFORMATION

From June of 2000 to August of 2008 I did not hold an academic position. During that time, my mother was chronically and acutely ill, and she had neither health insurance nor any other means to pay her medical

bills. My academic position in 2000 at Stanford University did not pay enough for me to pay her medical bills. I therefore left Stanford and took employment in the computer industry in order to earn enough to pay her medical bills and otherwise support her. When I no longer had that obligation in 2008, I returned immediately to academia.

That also explains why I held a lectureship in 1998-1999 and a post-doctoral position in 1999-2000, both at Stanford, but did not receive my Ph.D. until 2005: when I was hired for the positions at Stanford, it was with the agreement that I would finish my Ph.D. in 1999. My mother's illness prevented me from completing it then. I worked on it afterward when I could, while I held positions in software.
